Accreditation Process
Why Work with The Joint Commission?

The On-Site Survey Process

The Joint Commission’s accreditation process helps home care organizations improve safety as well as the quality of care and services provided. We begin with an on-site survey that assesses compliance with our rigorous, evidence-based standards. A typical on-site survey is conducted by a single surveyor over two or three days, and it involves:

– Tracing the patient’s or client’s experience
  • including an examination of records and services performed

– Systems tracers
  • The systems/processes that support operations

– On-site observations and interviews with surveyors

– Review of documents provided by the organization

The more you engage with your surveyor, the more meaningful your survey experience!

What to Expect After the Survey

- Communication of survey observations with delivery of preliminary report
- On-site survey report posted on your extranet site within 10 days
- Collaborate with Account Executive and SIG to address compliance issues
- Submit evidence of standards compliance within a 60-day window
- Accreditation granted upon approval of Evidence of Standards Compliance (ESC). The accreditation effective date then becomes the day after the last day of the survey.
